IMPORTANCE VS. SUPPORT

Dimension	Score ± margin	Standing	Items needing attention	Worst item
Work Activity	56 ± 3	Below	3 of 7 items need attention	Focused individual work that requires concentration and minimal interruption (Friction 37)
Physical Feature	64 ± 2	Below	4 of 9 items need attention	Availability of spaces that support focused work (Friction 32)
Service Level	73 ± 2	Below	0 of 8 items need attention	Availability of on-site food and beverage options (Friction 14)
Digital & Tech	71 ± 2	In line	0 of 6 items below 3.5 agreement	Video conferencing and meeting room technology reliably support in-person and virtual meetings (agreement 3.58)

By question

Question	Importance	Support	Gap	Status
Work Activity				
Planned in-person meetings at a PulsePoint	2.0	3.6	+1.6	▲ Exceeds needs
Informal or spontaneous collaboration with colleagues	2.5	3.3	+0.8	● On track, low support
Working with others on shared tasks or problem-solving	2.8	3.2	+0.4	● On track, low support
Learning, training, or skill development	3.1	3.2	+0.1	● On track, low support
Virtual collaboration with remote or hybrid colleagues	3.8	3.4	-0.4	▼ Needs attention · slight
Tasks requiring discretion	3.7	3.0	-0.7	▼ Needs attention · moderate
Focused individual work that requires concentration and minimal interruption	4.2	3.0	-1.3	▼ Needs attention · severe
Physical Feature				
Availability of community spaces (i.e. gathering, event spaces, café)	2.6	3.8	+1.3	● On track
Availability of meeting and collaboration spaces (individual and group)	3.0	3.7	+0.6	● On track
Availability of spaces that support personal wellbeing or restoration (quiet space, wellness rooms, walking treadmills, etc.)	3.1	3.6	+0.6	● On track
Ease of navigating and finding spaces (directions and signage)	3.5	3.7	+0.2	● On track
Lighting comfort (natural and artificial)	3.7	3.7	+0.0	● On track
Furniture comfort and ergonomics (including adjustability of chair and workstation)	3.9	3.7	-0.3	▼ Needs attention · slight
Thermal / temperature comfort	3.9	3.5	-0.4	▼ Needs attention · slight
Availability of spaces that support discretion	4.0	3.2	-0.8	▼ Needs attention · moderate
Availability of spaces that support focused work	4.2	3.2	-1.1	▼ Needs attention · severe
Service Level				
Entry and reception	2.9	4.3	+1.4	● On track
Support from a community manager	2.9	3.8	+0.9	● On track
Access to workplace support services that support daily needs (e.g., office supplies, printing, mail)	3.0	3.5	+0.5	● On track
Availability of on-site food and beverage options	3.0	3.3	+0.3	● On track, low support
Cleanliness and upkeep of PulsePoint	4.1	4.2	+0.2	● On track
Ability to get help resolving workplace or technology issues while on site	4.0	4.1	+0.1	● On track
Reliability of building operations (e.g., elevators, restrooms, etc.)	4.2	4.2	+0.1	● On track
Communication about workplace updates, changes, or disruptions	3.8	3.9	+0.1	● On track
Digital & Tech				
Reservation tools are easy to use	—	4.0	—	◇ Moderate (agreement)
Digital collaboration tools (e.g., Microsoft tools) support effective work with remote or hybrid colleagues	—	4.0	—	◇ Moderate (agreement)
I can connect and start working at a PulsePoint without unnecessary technical friction (WiFi, power or cabling, monitors or peripherals, log-in/system access)	—	3.9	—	◇ Moderate (agreement)
Workplace-provided hardware (e.g., monitors, keyboards, mice, power) is readily available and works as expected	—	3.8	—	◇ Moderate (agreement)
Technical issues that affect my ability to work are resolved in a timely manner	—	3.8	—	◇ Moderate (agreement)
Video conferencing and meeting room technology reliably support in-person and virtual meetings	—	3.6	—	◇ Moderate (agreement)

Gap = Support − Importance (1–5). Status is the official support status: ▼ Needs attention (Under Supported) · ● On track (Target) · ▲ Exceeds needs (Over Supported). Needs-attention items carry a severity from the rounded gap (−0.1 to −0.4 slight, −0.5 to −0.9 moderate, −1.0 or worse severe) and are marked *borderline* when the gap's 95% interval includes 0; “On track, low support” = on track but Support under 60/100. Digital & Tech has no Importance rating: ◇ shows its agreement band (Strong ≥ 4.0 · Moderate 3.5–3.9 · Needs attention < 3.5).

ASSOCIATE SENTIMENT

Dimension	Summary question	Site ± margin	Company	Difference	Standing
Work Activity	“My workplace enables me to work productively” (Q8)	3.10 ± 0.13	3.31	-0.21	**Below**
Physical space	“I feel comfortable and safe while working at the PulsePoint” (Q12)	3.79 ± 0.11	3.94	-0.15	**Below**
Services	Overall ease of using the PulsePoint — Services (Q16)	3.74 ± 0.11	3.91	-0.17	**Below**
Technology	Overall ease of using the PulsePoint — Technology (Q19)	3.71 ± 0.11	3.83	-0.12	**Below**
Overall	Average of the four items	3.59 ± 0.10	3.75	-0.16	**Below**

1–5 agreement. Standing: Above / Below when the company mean lies outside the site's 95% interval; otherwise In line. Q16 = Services and Q19 = Technology by survey position.

TOP PRIORITIES — SURVEY ITEMS

The five survey items with the highest Friction at this site, with the comment themes linked to each and one illustrative comment.

1 Focused individual work that requires concentration and minimal interruption

▼ Needs attention · severe

- Friction **37**/100 · **64% under-supported** (Work Activity)
- Comment themes: Focus / Concentration — 59 people (15% of respondents); Noise & Distraction — 105 people (27% of respondents); Space Availability & Crowding — 23 people (6% of respondents)

> *The loud noise from the people sitting around me.*
> Director or Manager · comment tagged Noise & Distraction

2 Availability of spaces that support focused work ▼ Needs attention · severe

- Friction **32**/100 · **56% under-supported** (Physical Feature)
- Comment themes: Focus / Concentration — 59 people (15% of respondents); Noise & Distraction — 105 people (27% of respondents); Space Availability & Crowding — 23 people (6% of respondents)

> *staying at our desk to have meetings - the walls are low and sometimes very distractive.*
> Director or Manager · comment tagged Noise & Distraction

3 Availability of spaces that support discretion ▼ Needs attention · moderate

- Friction **28**/100 · **50% under-supported** (Physical Feature)
- Comment themes: Privacy & Confidentiality — 75 people (19% of respondents)

> *When taking calls, using the phone booth is not productive without the use of larger screens.*
> Associate · comment tagged Privacy & Confidentiality

4 Tasks requiring discretion ▼ Needs attention · moderate

- Friction **27**/100 · **50% under-supported** (Work Activity)
- Comment themes: Privacy & Confidentiality — 75 people (19% of respondents)

> *Finding a quite space that support discretion for the calls I need to make with our audit colleagues. The phone booths get quite uncomfortable after a short period.*
>
> Associate · comment tagged Privacy & Confidentiality

5 Virtual collaboration with remote or hybrid colleagues ▼ Needs attention · slight

- Friction **20**/100 · **39% under-supported** (Work Activity)
- Comment themes: AV / Video Conferencing — 14 people (4% of respondents); Privacy & Confidentiality — 75 people (19% of respondents); Noise & Distraction — 105 people (27% of respondents)

> *Too much open space with low walls. We need more cubes/cubicles with walls higher than head level (this minimizes sound travelling and disturbing others), and enables associates to get on calls without disturbing others around them.*
>
> Associate · comment tagged Noise & Distraction

Technology watch: Video conferencing and meeting room technology reliably support in-person and virtual meetings — agreement 3.58 ± 0.09, company 3.72 (Below); Digital collaboration tools (e.g., Microsoft tools) support effective work with remote or hybrid colleagues — agreement 3.96 ± 0.08, company 4.06 (Below)

What comments add — by category

Category	People (% of respondents)	% negative	Friction	Score
Focused / Private Work	146 (37%)	67%	30	89
Physical Environment	126 (32%)	57%	16	68
Technology	111 (28%)	59%	12	61
Amenities & Services	108 (28%)	32%	8	47
Workplace Operations	72 (18%)	40%	7	40
Collaboration & Meetings	48 (12%)	52%	7	37
Policy / Experience	35 (9%)	42%	—	32

Score = 40% people raising it + 35% share of comments negative + 25% Friction (each rescaled). Generic praise / dissatisfaction buckets are excluded.

WHAT NEEDS ATTENTION

- **Noise & Distraction** — 105 people (27% of respondents) · 137 comments, 74% negative
- **Privacy & Confidentiality** — 75 people (19% of respondents) · 100 comments, 62% negative
- **Hardware (Monitors / Peripherals)** — 74 people (19% of respondents) · 98 comments, 65% negative
- **Desk Availability & Reservations** — 66 people (17% of respondents) · 84 comments, 57% negative

WHAT'S WORKING

- **Wellbeing / Wellness Spaces** — 13 people (3% of respondents) · 14 comments, 57% positive
- **Entry and reception** — survey rating: support 81/100 (best-supported item)

- **Focus / Concentration** — 59 people (15% of respondents) · 75 comments, 68% negative

THEMES THAT DIFFER HERE

No theme's share of people differs from the other in-scope sites beyond chance.

Operational Action Plan — What to Do Next

Auto-generated draft to validate — not a re-summary of the survey. Primary owner for every action: **Regional Director + Local Team**. A full read of the report card below is still recommended. The team's job: Confirm / Modify / Reject, then assign owner, cost, and timing.

> **Evidence check (2026-11-10):** the corrected data weakens the support for the items below. They are left in place for the site team to confirm, modify or reject.
>
> - Priority 5 (Meeting-room and video-conferencing reliability): the AV / Video Conferencing comments behind it fall from 39 to 14 (14 people) once bare mentions of Microsoft Teams stop counting; the priority now rests on the Under Supported virtual-collaboration item and Meeting & Conference Rooms comments.
> - Protect item 'Community & Events': the true positive share is 29% (19% negative) — it no longer clears the What's-working bar
> - Protect item 'Cleanliness & Upkeep': the true positive share is 47% (28% negative) — it no longer clears the What's-working bar

1 Quiet, private space for focus and confidential work

LOCAL PROJECT

Associates cannot reliably find quiet or private space for concentrated work and confidential conversations; even managers with designated space report having to leave their seat for a booth. This is the site's single largest driver of dissatisfaction.

WHAT THIS LOOKS LIKE HERE

- even with designated manager/director space, there is still minimal privacy and sensitive conversations require you to get up and move to a privacy booth which is inconvenient and disruptive.
- Working at a pulse point is challenging due to potential missing items and high noise levels.

EVIDENCE

- **FINDING** Focused / Private Work is the #1 priority category (89/100).
- **FINDING** Friction for focused individual work is 37/100 — 64% under-supported; discretion 27/100 (50% under-supported).
- **FINDING** Noise & Distraction: 105 people (27% of respondents), 137 comments, 74% negative. Privacy & Confidentiality: 75 people (19% of respondents), 100 comments, 62% negative.
- **INTERPRETATION** Reserved seats lose value when the surrounding environment doesn't support the work done there.

PROPOSED ACTION Assess current quiet/phone-booth/enclosed-room capacity against peak demand; determine whether booking limits, an etiquette/quiet-zone protocol, or added enclosed capacity is the right fix before proposing construction.

TEAM Primary: **Regional Director + Local Team** · Support: Workplace Solutions, Change & Communications

SITE TEAM MUST Walk the floor at peak occupancy, log where and when private/quiet space runs out, compare with booth/room utilization, and escalate a capacity gap to Workplace Solutions with evidence.

2 Desk reservation reliability and arrival readiness

LOCAL ACTION

Desk reservations and the state of reserved workstations don't consistently hold up, so associates lose time getting set up when they arrive.

WHAT THIS LOOKS LIKE HERE

- Often cords or mouses are missing from desks and I do not know who to contact

EVIDENCE

- **FINDING** Desk Availability & Reservations: 66 people (17% of respondents), 84 comments, 57% negative — the 5th most-raised theme by people (it was the highest-volume theme before the November 2026 re-tag, which stopped counting every mention of a desk).
- **FINDING** Physical Environment is the #2 priority category (68/100).

PROPOSED ACTION Review booking rules and no-show behavior, and stand up a clear, visible path for reporting a desk found missing equipment on arrival.

TEAM Primary: **Regional Director + Local Team** · Support: Reservation-system owner, Technology

SITE TEAM MUST Audit a sample of reservations against actual occupancy for two weeks, confirm the failure mode (double-booking vs. no-shows vs. setup), and post the who-to-contact path at each neighborhood.

3 Workstation equipment reliability

LOCAL ACTION

Monitors, cords and peripherals at shared desks are frequently missing or misconfigured, interrupting work.

WHAT THIS LOOKS LIKE HERE

- The limited availability of capsule rooms with dual monitors. There are times I have presentations to facilitate, and I cannot find an empty capsule room (others working in them for longer than an hour.) and pods do not have monitors in...

EVIDENCE

- **FINDING** Hardware (Monitors / Peripherals): 74 people (19% of respondents), 98 comments, 65% negative.
- **INTERPRETATION** A recurring per-desk reliability issue rather than a one-off failure.

PROPOSED ACTION Institute a routine equipment check for shared workstations and standardize the docking/monitor setup so any desk works the same way on arrival.

TEAM Primary: **Regional Director + Local Team** · Support: Technology

SITE TEAM MUST Inspect a sample of workstations, catalog missing/broken peripherals and reset-monitor issues, and set a recurring check with Technology.

4 Thermal comfort (temperature)

LOCAL ACTION

Temperature is uneven across the floor — some desks run cold, especially in summer — so associates plan their day around which desk they can get.

WHAT THIS LOOKS LIKE HERE

- Sometimes the temperature is set to too cold and everyone on the floor is freezing especially in Summer time. ...
- Temperature control is difficult so depending on what desk I am able to secure I need to plan accordingly.
- Temperature can be an issue, can be too cold and uncomfortable.

EVIDENCE

- **FINDING** Temperature / Thermal: 36 people (9% of respondents), 40 comments, 68% negative.
- **FINDING** Thermal / temperature comfort: Under Supported — friction 19/100 (41% under-supported).

PROPOSED ACTION Have Workplace Operations map the cold zones by floor and time of day, then check set-points, airflow balancing and diffuser placement in those zones before considering any equipment change.

TEAM Primary: **Regional Director + Local Team** · Support: Workplace Operations

SITE TEAM MUST Log cold desks/zones and times for two weeks, submit them to building operations, and re-check after each adjustment to confirm it holds.

5 Meeting-room and video-conferencing reliability

LOCAL ACTION

Laptop connections, audio and screen-sharing in conference and meeting rooms fail intermittently, which undermines the client and hybrid meetings the rooms exist for.

WHAT THIS LOOKS LIKE HERE

- I have found that many of the conference room connections do not work well. They have been treated rough and when I connect my laptop sometimes they connect and disconnect intermittently. It is unreliable.
- Some of the meeting rooms do not function reliably. There are often connectivity issues, audio frequently cuts in and out during meetings, and several rooms lack accessible power outlets for charging laptops. ...
- ...Some conference rooms when you directly connect your laptop to share screens you lose your internet connection. ...

EVIDENCE

- **FINDING** Video conferencing & meeting-room technology agreement: 3.58 vs 3.72 company average (Moderate) — close to the 3.5 'Needs attention' line.
- **FINDING** Virtual collaboration with remote/hybrid colleagues: Under Supported — friction 20/100 (39% under-supported).
- **FINDING** Meeting & Conference Rooms: 35 people (9% of respondents), 45 comments, 58% negative; AV / Video Conferencing: 14 people (4% of respondents), 14 comments, 64% negative.

PROPOSED ACTION Have Technology test every conference and huddle room end-to-end (laptop connection, display, audio, camera, power), repair or replace worn cables and connectors, and post a short in-room quick-start guide.

TEAM Primary: **Regional Director + Local Team** · Support: Technology

SITE TEAM MUST Run a room-by-room test with Technology, log failures by room, and re-test the repaired rooms after 30 days.

PROTECT WHAT IS WORKING

- **Reception & Entry** — 35% positive and 9% negative across 23 comments from 22 people — most comments are neutral or mixed rather than praise *Maintain the current service level and monitor performance.*
- **Community & Events** — 29% positive and 19% negative across 31 comments from 26 people *Maintain the current service level and monitor performance.*
- **Cleanliness & Upkeep** — 47% positive and 28% negative across 43 comments from 33 people *Maintain the current service level and monitor performance.*

OPERATIONAL TEAM RESPONSE

PRIORITY	VALIDATE	ACTION TYPE	FINAL OWNER	COST	TARGET / ESCALATION
Quiet, private space for focus and confidential work	Confirm / Modify / Reject				
Desk reservation reliability and arrival readiness	Confirm / Modify / Reject				
Workstation equipment reliability	Confirm / Modify / Reject				

Thermal comfort (temperature)	Confirm / Modify / Reject				
Meeting-room and video-conferencing reliability	Confirm / Modify / Reject				

ASSUMPTIONS

- Quiet/enclosed-space utilization data isn't in the survey; an onsite walkthrough is needed to size any capacity gap before recommending build-out.
- Woodland Hills is below the company average overall (Index 66 ± 2 vs 69.0); these priorities target its largest, most-cited gaps first.

Auto-generated draft · Claude Opus/Cowork · 2026-09-29 · evidence refreshed 2026-11-10

IN THEIR WORDS

> *Working at a pulse point is challenging due to potential missing items and high noise levels.*
>
> Associate · one of 102 negative comments tagged Noise & Distraction

> *even with designated manager/director space, there is still minimal privacy and sensitive conversations require you to get up and move to a privacy booth which is inconvenient and disruptive.*
>
> Director or Manager · one of 62 negative comments tagged Privacy & Confidentiality

> *The limited availability of capsule rooms with dual monitors. There are times I have presentations to facilitate, and I cannot find an empty capsule room (others working in them for longer than an hour.) and pods do not have monitors in them. (understandable)*
>
> Associate · one of 64 negative comments tagged Hardware (Monitors / Peripherals)

> *i know we do not have enough people to start a cafeteria with fresh food with kitchen and cooks. Options in the fridge are very limited.*
>
> Associate · one of 32 negative comments tagged Food & Beverage

> *It would be nice to have more 'regular' desks available for reservation at Director level - there seem to be a lot of small hoteling desk that put individuals very close together (ie Zone F 2nd floor), these type spaces are not ideal*
>
> Director or Manager · one of 48 negative comments tagged Desk Availability & Reservations

> *Carolina is great. Super helpful with anything we ask of her and always has great events. The cleaning staff is amazing. They are always smiling and quick to say hello or Good Moring. I use the gym, lunchroom and coffee areas and they are always clean and stocked with anything needed.*

Data source & method. PulsePoint survey export · completed responses · 10 in-scope sites. Support responses map to 0–100; each dimension is the average of its items; the Overall PulsePoint Experience Index is the **unweighted** average of the four Dimension Scores — the same calculation as the Tableau deck. ± is the 95% margin from resampling this site's respondents (2,000 resamples). Friction and status per the official Tableau spec. Theme prevalence counts people (one person can answer five open questions); comment counts are secondary. Themes come from a keyword taxonomy (29 themes across 7 categories, `taxonomy.py`). A comment shows the writer's role only when at least 10 respondents at the site share it; tenure is never shown beside a comment. “Company” means the 10 in-scope sites pooled, in the selected population (completed responses or all responses). Comment themes and sentiment are automated and not yet validated.
