PulsePoint Experience — IN-Indianapolis

Workplace experience report card · completed responses

68

Overall PulsePoint Experience Index Score 68 / 100 · Bottom third of sites (on par)

Rank 7 of 10 · Bottom third of sites · sites range 66–77

690 of 2,928 respondents (this site vs. all 10 sites) · 1,266 written comments

DIMENSION SCORES (0–100)

Work Activity	Physical	Services	Technology
63 #5/10	63 #10/10	77 #4/10	70 #10/10

The Index Score is the average of the four Dimension Scores (0–100) — the same calculation as the Tableau deck. Boxes show each dimension's score and its rank among the 10 sites. Tier = thirds of the 10-site distribution. (+/–) = vs. the company average.

Importance vs. Support gaps

Dimension	Importance	Support	Gap	Status
Work Activity	3.2	3.5	+0.3	On track
Physical Feature	3.5	3.5	+0.0	On track
Service Level	3.5	4.1	+0.6	On track
Digital & Tech	—	3.8	—	Moderate

Status: red = Needs attention · green = On track · orange = Exceeds needs. Digital & Tech is agreement-only, rated on the 1–5 agreement level (Strong ≥4.0 / Moderate 3.5–3.9 / Needs attention <3.5).

Focused / Private Work **(366 total)**

NEGATIVE · 196 (+188 more in HTML/CSV)

- Cube Farm is too loud, and moving to constantly to and from phone booth not practical, lose camera and double monitors if you are presenting horrible space — Director or Manager, 6 to 10 years
- If you are in a role that requires concentration and focus, it is very disturbing to be surrounded by individuals sitting on virtual calls all day. On the flip side, there are limited spaces (phone booths) for individuals to take virtual meetings. — Director or Manager, More than 10 years
- My team is very dispersed across the nation, so I spend the majority of my time on Teams calls. I understand that being person allows for collaboration, but there is not a very good place for you to take calls and avoid background noise. We added the quiet space, but that area cannot be used for phone calls. I am needing to find an area that limits conversations to meetings to generate a quiet location that does not pick up excessive background noise. — Director or Manager, 6 mos to 24 mos.
- according to our training regarding PHI, my work requires privacy. taking calls requires me to go find a private room or phone cube, if any are available. not a good use of time. people in the office are loud and disrespectful of a work environment. I'm not a manager, director or RVP so i cannot use an office which is where my role really should be. I am the only one from my team that is in Indianapolis that is required to go into the office. It makes zero sense! — Associate, More than 10 years
- More conversation booths — Associate, More than 10 years
- Sometimes people wear very strong perfumes/colognes. This causes me to become somewhat sick because those smells are overwhelming. Also, this makes it hard to focus on my work. — Associate, 6 mos to 24 mos.
- If a colleague has virtual meetings all day, or majority of the day, and they are not a Staff VP or a level for an office, it can become distracting for others sitting in the cubicles around them. It is too bad they do not have access to an office for those days. — Associate, More than 10 years
- No other types of work, but the open low cubicles do not support focused work or discretion. — Associate, 2 to 5 years

NEUTRAL / MIXED · 123 (+115 more in HTML/CSV)

- No. I work 100% remotely whether I'm arbitrarily in a Pulsepoint or in my home office where I can work without distraction or interruption without the intense mental stress of 3+ hours a day commuting. — Director or Manager, More than 10 years
- One of the primary challenges with working in the PulsePoint office is the current workspace layout. In my role, I spend the majority of my day on conference calls. While some members of my team do come into the office, we rarely have opportunities to collaborate in person because much of our work involves virtual meetings with teams that are located across different PulsePoints and geographic locations. Another significant challenge is maintaining confidentiality during sensitive discussions. Currently, office space reservations are limited to two hours per day, which creates difficulties for managers and directors who are frequently involved in confidential meetings, employee discussions, and business-related conversations that require privacy. The limited availability of private workspace often makes it challenging to effectively perform these responsibilities while onsite. As a result, many of these meetings are now scheduled on days when I am working remotely, which can create additional scheduling and collaboration challenges. Providing managers and directors with the ability to reserve private office space for longer periods of time would greatly improve productivity, support confidentiality requirements, and enhance the overall in-office experience. Expanding access to private workspaces would allow leaders to be more effective while onsite and would better align the office environment with the realities of how many teams operate today. — Director or Manager, 2 to 5 years
- An environment free from distractions where I don't require noise cancelation or loud music to drown out my surroundings. Whomever conceptualized an open office environment has clearly not needed to work in one. Not many people show up in my area but it's common for people to take meetings in the open. Their participation is distracting. Enough of our team work remotely or in other facilities that being in-person for meetings isn't realistic or a benefit. — Associate, 2 to 5 years
- Only one of my team is in the same hybrid model as I am and the majority of my team are in other states. I do not see any of my team in office because they are in other States. The teams I do interact with are not in the same State. The only interactions I have in office is with my direct boss and that is only on occasion. So any interactions in office are minimal. I am typically in meetings with presentations, so I end up sitting in one of the phone booths most of my time in office to not disrupt folks around me or so confidential information is not heard by others around me. — Director or Manager, More than 10 years
- 1. My team is spread out in all time zones, so I have online meetings. I usually get feedback when in office that there is disturbance in the background (usually due to others running meetings at the same time). 2. There is no one in my current team that I need to meet with physically in the Pulse Point. I do interact with others at workplace who are not in my business area. I have to be cognizant to keep those short so I do not disturb others and I myself can focus on my core work. (Would be nice to have some areas at workplace for people to just chat, there are a few in the office, but it takes time from workday to physically get there and back from one's desk). Practically there is very less time between meetings that one can spare. 3. My couple hours of commute in the traffic adds to my already long workday/hours. 4. I find I am able to concentrate more (less disturbances), have great virtual collaboration and problem solving with my team, tasks requiring discretion from my

home office rather than a Pulse Point. — Director or Manager, More than 10 years

• My work is mostly confidential interactions with major clients and regulators. — Associate, More than 10 years

• I routinely run into network connectivity issues while at the Indy PulsePoint that impacts my ability to hear other attendees on Teams work calls. Additionally, I routinely have to try multiple workstations when setting up for the day due to power cords not allowing my laptop to display on the screens and the functionality of dual monitors (attempt to check connections of all cords to ensure something isn't loose). I am involved in majority discrete work that requires others around me not hearing my conversations, which is difficult due to either being in an open space (ie 4th floor) or designated quiet areas on the second floor which would prevent me from taking these types of calls at the regular work station. — Director or Manager, 6 mos to 24 mos.

• Fewer open space desks and more phone booths or solutions for quick/private calls. — Director or Manager, More than 10 years

POSITIVE · 47 (+39 more in HTML/CSV)

• I appreciate the quiet zone but am frequently on Teams call with my associates and this does require privacy. — Director or Manager, More than 10 years

• Increased private workspaces for associates needing to engage in confidential calls. — Associate, More than 10 years

• I think the pulse point does well supporting our work, however in my opinion it provides no productivity or enhancement. The pulse point gives me no motive to come into the office due to varying hybrid schedules and employees in different states. It actually makes me less productive because I'm more inclined to catch up with my co workers when they are occasionally in there who I haven't seen in person for a long time (which isn't a bad thing). Anything that can be done in the office can be done from working at home (important meetings, discretionary work, employee collaboration, etc.) which has been proven from my team's ability to complete tasks timely and efficiently. Also being able to enjoy nature by working in an office at home with a window open just provides more mental support than being enclosed in a pulse point office. — Associate, 2 to 5 years

• Would be helpful to have some quiet booths in the PulsePoint area I work in. — Director or Manager, More than 10 years

• My role as a director equivalent requires significant discretion and confidentiality, but the only space my level has for this is a phone booth. Not being able to reserve an office in my role limits my ability to be most effective in the office, therefore, I have to limit my office days when I don't have confidential meetings (which is rare). — Director or Manager, 6 mos to 24 mos.

• No, you've already created a Quiet Zone. I was already working in this zone prior to it becoming a Quiet Zone and the difference in distractions is astronomical. Fewer people sit there now and those that moved to another zone are the ones that congregated and had loud conversations, held meetings on their computer speakers or wore wireless headphones and walked around the area talking loudly, etc. I love the newly created Quiet Zone! Thank you! — Associate, More than 10 years

• I don't quite understand the quiet spaces, if the main goal is for people to collaborate, feel a sense of community and get to know co-workers and people across teams and different business units, quiet spaces seems counter productive — Director or Manager, More than 10 years

• The Indianapolis office does have spaces that allow for informal or spontaneous collaboration with colleagues outside of conversational areas. I travel to the Mason office a few times a year and I am very impressed with their collaboration spaces like the 2-4 person booths by the cafe. The booths provide a space that allows for laptop access and power and provides a somewhat private area. The conversation areas in Indy, like the 5th floor couch area, are not utilized since the space does not provide a way to share screens for computer work and is too open for private conversations. They just become wasted space which is disappointing since my team intentionally goes into the office on the same days to be able to collaborate. — Associate, 2 to 5 years

Collaboration & Meetings (185 total)

NEGATIVE · 74 (+66 more in HTML/CSV)

• My team members are spread across the country and we are never able to meet in Indianapolis because of lack of meeting space availability. We typically need to meet in the Atlanta Pulsepoint. This isn't a big deal but just wanted to point it out. I understand that the Indianapolis Pulsepoint has a large number of employees and purposes it has to accommodate. — Associate, 6 to 10 years

• Not all co-workers in same location so there is really no in person collaboration as all meetings are attended via teams. — Associate, More than 10 years

• My team is very dispersed across the nation, so I spend the majority of my time on Teams calls. I understand that being person allows for collaboration, but there is not a very good place for you to take calls and avoid background noise. We added the quiet space, but that area cannot be used for phone calls. I am needing to find an area that limits conversations to meetings to generate a quiet location that does not pick up excessive background noise. — Director or Manager, 6 mos to 24 mos.

• No. But it's an interesting dynamic, because my needs conflict with each other a little bit. At certain times of the day, I need a very quiet space to perform intense analysis. Other times of the day I am in discussions and collaborating with coworkers. I often feel like I am disturbing people sitting around me when I'm in discussions and they are sometimes disturbing me when they do the same. — Associate, 6 to 10 years

• I don't have anyone on my team or anyone I work with to collaborate with in Indy so this is a waste of productive time for me to have to drive to/from work when i could be working more hours from home as i have for the last 15 years of my 25 year career here. — Director or Manager, More than 10 years

• More Meeting Space/ Meeting Booths — Director or Manager, 2 to 5 years

• Especially in the DPAIO area, our teams are split across the country and the world - it is rare that people on the same direct or even indirect teams share a state, let alone a specific office and time of day. With the office having limited focus areas and monitor arrangements that are not conducive to development, data analytics, and other DPAIO SME workloads, time spent in office is generally the least productive. Travel time and expense is incurred to sit in the same Teams meeting as before, but with a non-optimized setup, lots of background noise, and constant focus-breaks. On the rare occasions when there is an in-person meeting or event that is possible, it is then often difficult to book an appropriate size and location conference room, and there's more complexity in setting up screenshare and other collaboration. In short - while it is designed reasonably for typical office work, it is not designed for typical development /DPAIO work, and thus is a net productivity loss for many members of my team. Fortunately much of leadership is in Indianapolis, so there is value in being able to meet in person for me on that aspect, and to be able to contribute in non-development activities - but outside of those scenarios, it is a net loss. — Associate, More than 10 years

• Those who are not Staff VP or above cannot reserve offices nor can they reserve a conference room space on a regular basis. When your position requires you to be on back-to-back calls as well as periodically presenting to external clients and consultants, the open concept is not ideal. Noise carries and actually sounds louder to the folks on the call versus what I can hear through headphones. There is no time and it is a hassle to try to move logistically from place to place to take a call. Many discussions are not something you want everyone to overhear. — Director or Manager, More than 10 years

NEUTRAL / MIXED · 68 (+60 more in HTML/CSV)

• the rest of my team is at a level below me and they are only in the office one day per week, so there isn't any collaboration that i have when i am in the office on the other days of the week when the rest of the team isn't there — Director or Manager, 6 to 10 years

• One of the primary challenges with working in the PulsePoint office is the current workspace layout. In my role, I spend the majority of my day on conference calls. While some members of my team do come into the office, we rarely have opportunities to collaborate in person because much of our work involves virtual meetings with teams that are located across different PulsePoints and geographic locations. • None of my direct team members, except my Director, work in this PulsePoint. On site collaboration is only with adjacent teams. — Associate, More than 10 years

• Pre-covid we had our own desks, surrounded by our own team..... that shared the same goals, now we are all spread out, other areas incorporated within our teams making it hard to collaborate. — Associate, More than 10 years

• I think there's a 'flexible' type of work that includes multiple meetings back to back (that you don't necessarily want to take at your desk, but aren't required to be discrete), quick calls to collaborate, while needing time to get heads-down work done. Essentially, a 'D all of the above at any given time' — Associate, 6 to 10 years

POSITIVE · 43 (+35 more in HTML/CSV)

• I think it is totally stupid to have to drive downtown to sit in a cubicle when 100% of my teammates live outside my state. So I 'collaborate' exactly as I would if I were home, virtually. Therefore I have to spend money on gas, park, walk into the office - all to sit in a cubicle for a few hours to satisfy a badgeswipe requirement. If I had people to 'collaborate' with, having an office to do that within is great, but this is just ridulous. — Associate, More than 10 years

• I think the pulse point does well supporting our work, however in my opinion it provides no productivity or enhancement. The pulse point gives me no motive to come into the office due to varying hybrid schedules and employees in different states. It actually makes me less productive because I'm more inclined to catch up with my co workers when they are occasionally in there who I haven't seen in person for a long time (which isn't a bad thing). employee collaboration, etc.) which has been proven from my team's ability to complete tasks timely and efficiently. Also being able to enjoy nature by working in an office at home with a window open just provides more mental support than being enclosed in a pulse point office. — Associate, 2 to 5 years

• This is not a PulsePoint issue but I rarely see my team members. People tend to sit in areas other than our designated area. — Director or Manager, More than 10 years

• Onsite collaboration of colleagues. In my area we are located at various locations. Since I have been here, 4 years, we have only met in person once. I know it is an expense, but like to get to know people in person. — Director or Manager, 2 to 5 years

• RE: Virtual collaboration with remote or hybrid colleagues. There are plenty of rooms for virtual collaboration, but they are all oriented around having multiple people in one room collaborating with others virtually. There's no setting for having a conference room like experience for a single individual who is working with others remotely. As a result. I'm at my desk the entire day in front of my laptop working just like I would anywhere else. So as a director with no direct reports in the Indy PulsePoint, my collaboration opportunities are virtually the same in and out of the PulsePoint. — Director or Manager, 6 to 10 years

• I don't quite understand the quiet spaces, if the main goal is for people to collaborate, feel a sense of community and get to know co-workers and people across teams and different business units, quiet spaces seems counter productive — Director or Manager, More than 10 years

• The Indianapolis office does have spaces that allow for informal or spontaneous collaboration with colleagues outside of conversational areas. I travel to the Mason office a few times a year and I am very impressed with their collaboration spaces like the 2-4 person booths by the cafe. The booths provide a space that allows for laptop access and power and provides a somewhat private area. • All of my team is virtual, but I am still required to come in 3 days a week. I have reached out to HR about tis to see if my required in office can be moved to virtual since all of my direct reports and managers are full time work from home. — Director or Manager, 6 to 10 years

• 1. My team is spread out in all time zones, so I have online meetings. I usually get feedback when in office that there is disturbance in the background (usually due to others running meetings at the same time). 2. There is no one in my current team that I need to meet with physically in the Pulse Point. I do interact with others at workplace who are not in my business area. I have to be cognizant to keep those short so I do not disturb others and I myself can focus on my core work. (Would be nice to have some areas at workplace for people to just chat, there are a few in the office, but it takes time from workday to physically get there and back from one's desk). Practically there is very less time between meetings that one can spare. 3. My couple hours of commute in the traffic adds to my already long workday/hours. 4. I find I am able to concentrate more (less disturbances), have great virtual collaboration and problem solving with my team, tasks requiring discretion from my home office rather than a Pulse Point. — Director or Manager, More than 10 years

• Pre-covid we had our own desks, surrounded by our own team..... that shared the same goals, now we are all spread out, other areas incorporated within our teams making it hard to collaborate. — Associate, More than 10 years

• I routinely run into network connectivity issues while at the Indy PulsePoint that impacts my ability to hear other attendees on Teams work calls. Additionally, I routinely have to try multiple workstations when setting up for the day due to power cords not allowing my laptop to display on the screens and the functionality of dual monitors (attempt to check connections of all cords to ensure something isn't loose). I am involved in majority discrete work that requires others around me not hearing my conversations, which is difficult due to either being in an open space (ie 4th floor) or designated quiet areas on the second floor which would prevent me from taking these types of calls at the regular work station. — Director or Manager, 6 mos to 24 mos.

• Fewer open space desks and more phone booths or solutions for quick/private calls. — Director or Manager, More than 10 years

• I think there's a 'flexible' type of work that includes multiple meetings back to back (that you don't necessarily want to take at your desk, but aren't required to be discrete), quick calls to collaborate, while needing time to get heads-down work done. Essentially, a 'D all of the above at any given time' — Associate, 6 to 10 years

POSITIVE · 124 (+116 more in HTML/CSV)

• I think it is totally stupid to have to drive downtown to sit in a cubicle when 100% of my teammates live outside my state. So I 'collaborate' exactly as I would if I were home, virtually. Therefore I have to spend money on gas, park, walk into the office - all to sit in a cubicle for a few hours to satisfy a badgeswipe requirement. If I had people to 'collaborate' with, having an office to do that within is great, but this is just ridulous. — Associate, More than 10 years

• Honestly, I know the value of it, but the reception text in the courtyard is an eyesore, taking up space in the courtyard, blocking windows in the cafeteria hallway, and just overall bulbous. It has become a permanent structure. On the wishlist is a better solution for the long-term structure. — Director or Manager, 6 to 10 years

• I think the pulse point does well supporting our work, however in my opinion it provides no productivity or enhancement. The pulse point gives me no motive to come into the office due to varying hybrid schedules and employees in different states. It actually makes me less productive because I'm more inclined to catch up with my co workers when they are occasionally in there who I haven't seen in person for a long time (which isn't a bad thing). Anything that can be done in the office can be done from working at home (important meetings, discretionary work, employee collaboration, etc.) which has been proven from my team's ability to complete tasks timely and efficiently. Also being able to enjoy nature by working in an office at home with a window open just provides more mental support than being enclosed in a pulse point office. — Associate, 2 to 5 years

• My role as a director equivalent requires significant discretion and confidentiality, but the only space my level has for this is a phone booth. Not being able to reserve an office in my role limits my ability to be most effective in the office, therefore, I have to limit my office days when I don't have confidential meetings (which is rare). — Director or Manager, 6 mos to 24 mos.

• The Wi-Fi in Indy in underperforming. I don't mind plugging in my computer if a cable is easily available at my desk. — Director or Manager, 2 to 5 years

• RE: Virtual collaboration with remote or hybrid colleagues. There are plenty of rooms for virtual collaboration, but they are all oriented around having multiple people in one room collaborating with others virtually. There's no setting for having a conference room like experience for a single individual who is working with others remotely. As a result. I'm at my desk the entire day in front of my laptop working just like I would anywhere else. So as a director with no direct reports in the Indy PulsePoint, my collaboration opportunities are virtually the same in and out of the PulsePoint. — Director or Manager, 6 to 10 years

• The Indianapolis office does have spaces that allow for informal or spontaneous collaboration with colleagues outside of conversational areas. I travel to the Mason office a few times a year and I am very impressed with their collaboration spaces like the 2-4 person booths by the cafe. The booths provide a space that allows for laptop access and power and provides a somewhat private area. The conversation areas in Indy, like the 5th floor couch area, are not utilized since the space does not provide a way to share screens for computer work and is too open for private conversations. They just become wasted space which is disappointing since my team intentionally goes into the office on the same days to be able to collaborate. — Associate, 2 to 5 years

• My team likes to meet and work collaboratively in a room together when we have to be in the office. This reduces disruption to others in the office working. However, the meeting rooms were rearranged preventing comfortable team collaboration in a single meeting room with the

exception of 2 large meeting rooms which are typically reserved. — Associate, More than 10 years

• Sometimes people wear very strong perfumes/colognes. This causes me to become somewhat sick because those smells are overwhelming. Also, this makes it hard to focus on my work. — Associate, 6 mos to 24 mos.

• Especially in the DPAIO area, our teams are split across the country and the world - it is rare that people on the same direct or even indirect teams share a state, let alone a specific office and time of day. With the office having limited focus areas and monitor arrangements that are not conducive to development, data analytics, and other DPAIO SME workloads, time spent in office is generally the least productive. Travel time and expense is incurred to sit in the same Teams meeting as before, but with a non-optimized setup, lots of background noise, and constant focus-breaks. On the rare occasions when there is an in-person meeting or event that is possible, it is then often difficult to book an appropriate size and location conference room, and there's more complexity in setting up screenshare and other collaboration. In short - while it is designed reasonably for typical office work, it is not designed for typical development /DPAIO work, and thus is a net productivity loss for many members of my team. Fortunately much of leadership is in Indianapolis, so there is value in being able to meet in person for me on that aspect, and to be able to contribute in non-development activities - but outside of those scenarios, it is a net loss. — Associate, More than 10 years

• The security of the PulsePoint, while necessary, does make in person meetings more difficult to coordinate with external parties. — Director or Manager, 2 to 5 years

• There should be more availability for workspaces where confidentiality of conversations can be maintained. Meeting room hygiene also needs to be better - there are times when a room is reserved all day but it is not in use. This prevents others from using the room — Director or Manager, 2 to 5 years

• Hard to work with associates that place/take calls-working in the cafeteria accommodates my needs. — Associate, More than 10 years

• Technical work, why does this company always forget that we are a technology company now, and technical work is a large portion of required work. Pulsepoint has the cheapest technical equipment I've ever seen at a company, so it is a solid 'Does Not Support'. For reference, my two monitors at home probably cost more then the entire cube I'm forced to use at this building. — Associate, 6 mos to 24 mos.

• Just occasional minor annoyances, such a loud coworkers on calls nearby or when the restroom is closed for cleaning on my floor. Things are fine for the most part. Though new associates sometimes have a difficult time navigating the Pulsepoint, so signage (hanging signage?) might be helpful. — Associate, 6 to 10 years

• Cubicles and people near me. I am on a sensitive AI project and on meetings the entire day. I don't have time to go to lunch, take a bio break ect in office due to constant meetings. It is hard to find a private area the entire day. I am on telephone calls all day so not sure what people are hearing or if I am bugging them as talking all day. — Associate, More than 10 years

NEUTRAL / MIXED · 96 (+88 more in HTML/CSV)

• Having to plan an office visit around my calls because of an open room seating is not conducive. Also not one team mate that I work with is in my office so it becomes less important for collaboration and more of checking a box on the week. — Associate, 6 mos to 24 mos.

• A lot of people were turned off of gathering at lunchtime in the cafeteria. When the lunches were free, the cafeteria was packed and people collaborated and got out of their cubes. The prices now are quiet high for a hot meal, and most people bring their lunches and sit in their cubes. Meeting and gathering together informally is almost as important as gathering for a formal business meeting. Reducing or eliminating fees for a single hot meal and drink, or a salad bar and drink (not asking for a free for all, but a usual lunch) would go a long way to bringing back the camaraderie and getting people more engaged with each other and coming to the office more. — Associate, 6 to 10 years

• Our Community Managers, Security and Facilities do a really terrific job. I cannot think of anything that needs to be changed. — Associate, More than 10 years

• I need secluded area as I am on calls all day long with member data and would like to not over share for security purposes along with the fact I would like to not be a disruption to others. Since I am talking out loud all day from morning to night it can be a bother. — Director or Manager, More than 10 years

• I want to clarify my answers for question 2. I am the only person from my team at my pulse point, so that's why I selected 'neutral' for in-person meetings/gatherings. — Associate, 6 to 10 years

• The physical aspect that limits my ability to work effectively the most is thermal comfort. The office is consistently very cold throughout the day, which affects concentration and comfort. Improving temperature control or providing employees with more flexibility to manage their workspace environment would significantly enhance productivity and overall employee experience. Here are a few recommendations to consider: Designated warmer and cooler work zones Space heaters or other approved personal comfort solutions where appropriate More balanced thermostat settings Temperature monitoring across different office areas Gathering employee feedback on thermal comfort to identify problem areas Conduct a workplace comfort survey. — Director or Manager, More than 10 years

• Would be nice to have extra bathroom on floor. — Director or Manager, 2 to 5 years

• I love being in the office to network, but working in the office does create stress and increase anxiety at times. There are days I leave the office with anxiety that I didn't get a lot of 'work' done. On certain days, It is extremely difficult to find a locations to have discrete conversations or to find collaboration spaces to take meetings. On many occasions I have been late for calls looking for a private place to take a call. Because

I am in back to back meetings on many days - it can be difficult to leave a private space (phone booth) to allow others the opportunity to use the discrete location. I try to be respectful, but sometimes that means I have to jump on my next call, while in motion so someone else can have the phonebooth which is disruptive and stressful. I try to sit in the same work station every day, but there are times someone has used the space and they change the chair/monitor settings so it can take up to 30-45 minutes trying to readjust everything to my comfort level. HUGE shoutout to the community managers who are vigilant in their commitment to foster positive behavior. There are always going to be a handful of associates who disregard or disrespect space (e.g. taking a call w/o headphones, speaking loudly, or listening to music on speaker) - it's just human nature for some people to be thoughtless or selfish. The community managers are very proactive about addressing those issues in real-time. Huge shout out to Mindy and Robin - who are among the best! — Director or Manager, More than 10 years

NEUTRAL / MIXED · 127 (+119 more in HTML/CSV)

• One of the primary challenges with working in the PulsePoint office is the current workspace layout. In my role, I spend the majority of my day on conference calls. While some members of my team do come into the office, we rarely have opportunities to collaborate in person because much of our work involves virtual meetings with teams that are located across different PulsePoints and geographic locations. Another significant challenge is maintaining confidentiality during sensitive discussions. Currently, office space reservations are limited to two hours per day, which creates difficulties for managers and directors who are frequently involved in confidential meetings, employee discussions, and business-related conversations that require privacy. The limited availability of private workspace often makes it challenging to effectively perform these responsibilities while onsite. As a result, many of these meetings are now scheduled on days when I am working remotely, which can create additional scheduling and collaboration challenges. Providing managers and directors with the ability to reserve private office space for longer periods of time would greatly improve productivity, support confidentiality requirements, and enhance the overall in-office experience. Expanding access to private workspaces would allow leaders to be more effective while onsite and would better align the office environment with the realities of how many teams operate today. — Director or Manager, 2 to 5 years

• Monthly associate conversations via teams — Director or Manager, More than 10 years

• Only one of my team is in the same hybrid model as I am and the majority of my team are in other states. I do not see any of my team in office because they are in other States. The teams I do interact with are not in the same State. The only interactions I have in office is with my direct boss and that is only on occasion. So any interactions in office are minimal. I am typically in meetings with presentations, so I end up sitting in one of the phone booths most of my time in office to not disrupt folks around me or so confidential information is not heard by others around me. — Director or Manager, More than 10 years

• None of my direct team members, except my Director, work in this PulsePoint. On site collaboration is only with adjacent teams. — Associate, More than 10 years

• Pre-covid we had our own desks, surrounded by our own team..... that shared the same goals, now we are all spread out, other areas incorporated within our teams making it hard to collaborate. — Associate, More than 10 years

Vendors are brought in this area, and they see the broken, or misfunctioning equipment. — Director or Manager, 6 to 10 years

• Small meeting capsules are limited and busy days it is hard to find a quick space to discuss confidential items with associates. — Director or Manager, 2 to 5 years

• Ability to persist in a single space for multiple activities throughout a given day at a PulsePoint. Example: Many of my meetings/interactions require discretion. Having to transition back and forth from cubicles to available private spaces costs me a lot of time during my day. This exhibits itself both in the time to setup/tear down in each space and the distraction of people that stop me along the way from place to place. I recognize that this is likely more an issue with the management requirement of Hybrid 2 than it is with the PulsePoint layout itself. When we were Hybrid 1, it was possible to schedule office days to align with a calendar day that had more flexibility. Now that we're in office 3 days/week, there are some days where this becomes incredibly difficult. — Director or Manager, More than 10 years

• I don't have anyone on my team or anyone I work with to collaborate with in Indy so this is a waste of productive time for me to have to drive to/from work when i could be working more hours from home as i have for the last 15 years of my 25 year career here. — Director or Manager, More than 10 years

• I wish we had a few more quiet capules for meetings. Sometimes it's hard to find an open one nowadays. — Director or Manager, 2 to 5 years

• The combination of limited staff vp office reservations, along with limited capacity (and poor circulation for long periods) of phone booths make it very challenging to be on calls more than 1 time per day without disturbing others in the vicinity by being on long calls from one's reserved desk. Working on confidential information (eg, employee information) is incredibly difficult given the 'open' layout where monitors of virtually every desk are viewable by others. — Director or Manager, More than 10 years

• I was established at home before COVID forced everyone home, so I will always be more productive in getting work done at my Home office than at a PulsePoint. Being Forced to go into the PulsePoint is a disruption to my day and the focus of my projects. I like the idea of having a place to meet up, if needed to discuss data or issues with my team, but on most occasions, I can and will be chatting on TEAMS because not everyone on our team is located in Indianapolis. SO meeting in person is still Remote even at a PulsePoint. At home I can keep the flow of work going, but when going into the Office, I have to chop up that flow and take time away to drive into an office. So it's a waste of time, and even when I go into the office, the work is still required when I get home, making it a disruption to work flow. — Associate, More than 10 years

• The Indy Pulse point doesn't adequately support the work that I do as I am often on calls with clients and discussing upcoming changes, strategy planning or other sensitive information. Most of the cubicle space is very open and can get loud while several people may be on calls or having discussions. Offices may be available to book a private space, but they are usually booked up. — Associate, 6 to 10 years

NEUTRAL / MIXED · 96 **(+88 more in HTML/CSV)**

• One of the primary challenges with working in the PulsePoint office is the current workspace layout. In my role, I spend the majority of my day on conference calls. While some members of my team do come into the office, we rarely have opportunities to collaborate in person because

much of our work involves virtual meetings with teams that are located across different PulsePoints and geographic locations. I find I am able to concentrate more (less disturbances), have great virtual collaboration and problem solving with my team, tasks requiring discretion from my home office rather than a Pulse Point. — Director or Manager, More than 10 years

• Better discretion with better noise barriers and/or white noise. Private meetings/coaching etc. can be heard about associates from others around the office b/c it is too quiet. Additionally, we should have our parking garage passes work since we work there not based on how often we are officially scheduled to come in. — Associate, More than 10 years

• All of my work-related duties require extreme privacy. I work with confidential information regarding associates and should not be in an open environment. I am unable to take confidential calls or meetings for long periods at the PulsePoint. I am less productive in the office. Because of having a long tenure, it's difficult to avoid running into former colleagues that wish to talk (catch-up) for long periods of time. While it's lovely and can be emotional because the remote experience is lonely, it is non-productive. It is also a challenge to locate a quiet, productive workstation or office space. Providing more exclusive workstations that are larger than capsules would create more support. — Associate, More than 10 years

• My only issue is not having enough private space to handle tasks requiring discretion. There are people who regularly sit in our 'neighborhood' who are not part of the HR team, which makes it challenging to remain seated within the cube I've reserved to even participate on those calls. Phone booth or private room space is limited within this PulsePoint, so it can be quite frustrating. While I completely understand and support the goals of collaborating with associates across organizations within the company, it's challenging to accommodate the sensitive nature of some of the work we do when we are surrounded by associates who should not be privy to that information at that time. It would be helpful to have more 'control' over who sits in the HR neighborhood area to support that business need. — Director or Manager, More than 10 years

• A lot of people were turned off of gathering at lunchtime in the cafeteria. When the lunches were free, the cafeteria was packed and people collaborated and got out of their cubes. The prices now are quiet high for a hot meal, and most people bring their lunches and sit in their cubes. Meeting and gathering together informally is almost as important as gathering for a formal business meeting. Reducing or eliminating fees for a single hot meal and drink, or a salad bar and drink (not asking for a free for all, but a usual lunch) would go a long way to bringing back the camaraderie and getting people more engaged with each other and coming to the office more. — Associate, 6 to 10 years

POSITIVE · 68 (+60 more in HTML/CSV)

• I think it is totally stupid to have to drive downtown to sit in a cubicle when 100% of my teammates live outside my state. So I 'collaborate' exactly as I would if I were home, virtually. Therefore I have to spend money on gas, park, walk into the office - all to sit in a cubicle for a few hours to satisfy a badgeswipe requirement. If I had people to 'collaborate' with, having an office to do that within is great, but this is just ridulous. — Associate, More than 10 years

• The Indianapolis office does have spaces that allow for informal or spontaneous collaboration with colleagues outside of conversational areas. I travel to the Mason office a few times a year and I am very impressed with their collaboration spaces like the 2-4 person booths by the cafe. The booths provide a space that allows for laptop access and power and provides a somewhat private area. The conversation areas in Indy, like the 5th floor couch area, are not utilized since the space does not provide a way to share screens for computer work and is too open for private conversations. They just become wasted space which is disappointing since my team intentionally goes into the office on the same days to be able to collaborate. — Associate, 2 to 5 years

• As a Director without direct reports, I am held to the same Director-level expectations for performance, leadership, accountability, and annual reviews as my peers who do manage teams. However, I do not receive the same consideration when it comes to workplace privileges, such as reserving office space or parking directly behind the building—benefits that are available to Directors with direct reports. This disparity feels

inequitable. If all Directors are expected to meet the same standards and responsibilities, they should also be afforded the same level of access and consideration, regardless of whether they have direct reports. Additionally, the nature of my role requires extensive collaboration with virtual team members and participation in meetings that often involve sensitive or confidential subject matter. Approximately 90% of my workday is spent in meetings that require significant discussion and focus. These responsibilities can make it challenging to work effectively in a traditional office environment and should be taken into consideration when evaluating workplace accommodations and access. — Director or Manager, 6 to 10 years

• Having to very frequently spend time to re-connect/reset workstations so that they actually will communicate with laptop. Having to clean workstations from previous user. — Associate, 6 to 10 years

• It's just inconvenient. At home everything is setup for me personally and allows me to be as productive as possible. There's no wasted commute time or trying to get hooked up to the wifi or monitors, adjusting chairs, etc. — Associate, 6 mos to 24 mos.

• I have no problems with the building itself. — Associate, 2 to 5 years

• Inability to find available meeting spaces on my floor/building (i.e., without going to the opposite end on another floor), too few meeting spaces designed for 1-4 people. Our common spaces are good. I enjoy all the natural light we have in the office and often will sit by the window. Frequently though, where I sit in Legal (4W), one or both of the monitors as well as mouse and keyboard are not working which is frustrating. — Director or Manager, More than 10 years

• It would be great if we were able to access the parking garage using badges rather than relying on getting tickets and using slips of paper to scan out. But I appreciate that parking is free. That is definitely not a given in downtown Indianapolis. — Associate, 6 to 10 years

Policy / Experience **(296 total)**

NEGATIVE · 81 **(+73 more in HTML/CSV)**

• It is nearly impossible to train at the PulsePoint. My primary responsibility is training others, and there is no space where I can be untinterrupted for 2+ hours to train virtually (and not interrupt/annoy others around me) while still having access to the multiple screens I need to run the training. If I could use the hybrid offices, that would provide me a space to train, but I currently do not have access. — Associate, 2 to 5 years

• My team is very dispersed across the nation, so I spend the majority of my time on Teams calls. I understand that being person allows for collaboration, but there is not a very good place for you to take calls and avoid background noise. We added the quiet space, but that area cannot be used for phone calls. I am needing to find an area that limits conversations to meetings to generate a quiet location that does not pick up excessive background noise. — Director or Manager, 6 mos to 24 mos.

• Ability to persist in a single space for multiple activities throughout a given day at a PulsePoint. Example: Many of my meetings/interactions require discretion. Having to transition back and forth from cubicles to available private spaces costs me a lot of time during my day. This exhibits itself both in the time to setup/tear down in each space and the distraction of people that stop me along the way from place to place. I recognize that this is likely more an issue with the management requirement of Hybrid 2 than it is with the PulsePoint layout itself. When we were Hybrid 1, it was possible to schedule office days to align with a calendar day that had more flexibility. Now that we're in office 3 days/week, there are some days where this becomes incredibly difficult. — Director or Manager, More than 10 years

• I don't have anyone on my team or anyone I work with to collaborate with in Indy so this is a waste of productive time for me to have to drive to/from work when i could be working more hours from home as i have for the last 15 years of my 25 year career here. — Director or Manager, More than 10 years

• Especially in the DPAIO area, our teams are split across the country and the world - it is rare that people on the same direct or even indirect teams share a state, let alone a specific office and time of day. With the office having limited focus areas and monitor arrangements that are not conducive to development, data analytics, and other DPAIO SME workloads, time spent in office is generally the least productive. Travel time and expense is incurred to sit in the same Teams meeting as before, but with a non-optimized setup, lots of background noise, and constant focus-breaks. On the rare occasions when there is an in-person meeting or event that is possible, it is then often difficult to book an appropriate size and location conference room, and there's more complexity in setting up screenshare and other collaboration. In short - while it is designed reasonably for typical office work, it is not designed for typical development /DPAIO work, and thus is a net productivity loss for many members of my team. Fortunately much of leadership is in Indianapolis, so there is value in being able to meet in person for me on that aspect, and to be able to contribute in non-development activities - but outside of those scenarios, it is a net loss. — Associate, More than 10 years

• I was established at home before COVID forced everyone home, so I will always be more productive in getting work done at my Home office than at a PulsePoint. Being Forced to go into the PulsePoint is a disruption to my day and the focus of my projects. I like the idea of having a place to meet up, if needed to discuss data or issues with my team, but on most occasions, I can and will be chatting on TEAMS because not everyone on our team is located in Indianapolis. SO meeting in person is still Remote even at a PulsePoint. At home I can keep the flow of work going, but when going into the Office, I have to chop up that flow and take time away to drive into an office. So it's a waste of time, and even when I go into the office, the work is still required when I get home, making it a disruption to work flow. — Associate, More than 10 years

• Not having the ability to reserve a private office for more than a single two-hour block limits my ability to conduct confidential meetings throughout the day, which is a regular requirement of my role. There are also not enough phone booths available, and using them is often impractical because I need access to my workstation and a second monitor during many meetings. Disconnecting and relocating multiple times throughout the day reduces productivity and disrupts workflow. In addition, the open workspace on Floor 5 is frequently noisy, making it difficult to focus and complete work while remaining near colleagues in my organization. While quieter space may be available on other floors, needing to relocate elsewhere in the building to perform focused work diminishes the value of commuting to the office, particularly given my approximately one-hour commute each way. As a result, being onsite often feels more like a compliance exercise than a productive work

experience, and it has negatively affected morale. The physical work environment also presents challenges. The office is consistently cold regardless of floor location, and I routinely need to bring a jacket and blanket, even during the summer months. Additionally, because workstations are not assigned, I must transport my equipment and accessories each time I come into the office. Collectively, these issues make it more difficult to maintain productivity while working onsite. — Director or Manager, More than 10 years

• Technical work, why does this company always forget that we are a technology company now, and technical work is a large portion of required work. Pulsepoint has the cheapest technical equipment I've ever seen at a company, so it is a solid 'Does Not Support'. For reference, my two monitors at home probably cost more then the entire cube I'm forced to use at this building. — Associate, 6 mos to 24 mos.

• One of the primary challenges with working in the PulsePoint office is the current workspace layout. In my role, I spend the majority of my day on conference calls. While some members of my team do come into the office, we rarely have opportunities to collaborate in person because much of our work involves virtual meetings with teams that are located across different PulsePoints and geographic locations. Another significant challenge is maintaining confidentiality during sensitive discussions. Currently, office space reservations are limited to two hours per day, which creates difficulties for managers and directors who are frequently involved in confidential meetings, employee discussions, and business-related conversations that require privacy. The limited availability of private workspace often makes it challenging to effectively perform these responsibilities while onsite. As a result, many of these meetings are now scheduled on days when I am working remotely, which can create additional scheduling and collaboration challenges. Providing managers and directors with the ability to reserve private office space for longer periods of time would greatly improve productivity, support confidentiality requirements, and enhance the overall in-office experience. Expanding access to private workspaces would allow leaders to be more effective while onsite and would better align the office environment with the realities of how many teams operate today. — Director or Manager, 2 to 5 years

• All of my team is virtual, but I am still required to come in 3 days a week. I have reached out to HR about tis to see if my required in office can be moved to virtual since all of my direct reports and managers are full time work from home. — Director or Manager, 6 to 10 years

• Only one of my team is in the same hybrid model as I am and the majority of my team are in other states. I do not see any of my team in office because they are in other States. The teams I do interact with are not in the same State. The only interactions I have in office is with my direct boss and that is only on occasion. So any interactions in office are minimal. I am typically in meetings with presentations, so I end up sitting in one of the phone booths most of my time in office to not disrupt folks around me or so confidential information is not heard by others around me. — Director or Manager, More than 10 years

• 1. My team is spread out in all time zones, so I have online meetings. I usually get feedback when in office that there is disturbance in the background (usually due to others running meetings at the same time). 2. There is no one in my current team that I need to meet with physically in the Pulse Point. I do interact with others at workplace who are not in my business area. I have to be cognizant to keep those short so I do not disturb others and I myself can focus on my core work. (Would be nice to have some areas at workplace for people to just chat, there are a few in the office, but it takes time from workday to physically get there and back from one's desk). Practically there is very less time between meetings that one can spare. 3. My couple hours of commute in the traffic adds to my already long workday/hours. 4. I find I am able to concentrate more (less disturbances), have great virtual collaboration and problem solving with my team, tasks requiring discretion from my home office rather than a Pulse Point. — Director or Manager, More than 10 years

• I enjoy being in the office, but find surrounding conversation distracting at times. — Associate, More than 10 years

• Much of my work is highly confidential and required collaboration with remote colleagues. Being a director level associate, I am unable to easily find space that works for this type of collaboration. — Director or Manager, 6 to 10 years

• All of my work-related duties require extreme privacy. I work with confidential information regarding associates and should not be in an open environment. I am unable to take confidential calls or meetings for long periods at the PulsePoint. I am less productive in the office. Because of having a long tenure, it's difficult to avoid running into former colleagues that wish to talk (catch-up) for long periods of time. While it's lovely and can be emotional because the remote experience is lonely, it is non-productive. It is also a challenge to locate a quiet, productive workstation or office space. • I appreciate the quiet zone but am frequently on Teams call with my associates and this does require privacy. — Director or Manager, More than 10 years

• I think it is totally stupid to have to drive downtown to sit in a cubicle when 100% of my teammates live outside my state. So I 'collaborate' exactly as I would if I were home, virtually. Therefore I have to spend money on gas, park, walk into the office - all to sit in a cubicle for a few hours to satisfy a badgeswipe requirement. If I had people to 'collaborate' with, having an office to do that within is great, but this is just ridulous. — Associate, More than 10 years

• I think the pulse point does well supporting our work, however in my opinion it provides no productivity or enhancement. The pulse point gives me no motive to come into the office due to varying hybrid schedules and employees in different states. It actually makes me less productive

because I'm more inclined to catch up with my co workers when they are occasionally in there who I haven't seen in person for a long time (which isn't a bad thing). Anything that can be done in the office can be done from working at home (important meetings, discretionary work, employee collaboration, etc.) which has been proven from my team's ability to complete tasks timely and efficiently. Also being able to enjoy nature by working in an office at home with a window open just provides more mental support than being enclosed in a pulse point office. — Associate, 2 to 5 years

• I appreciate the option to work on a hybrid schedule. I think some people, including me, are more productive when not in the office and it is amazing to be able to have a hybrid option. — Associate, 2 to 5 years

• No, you've already created a Quiet Zone. I was already working in this zone prior to it becoming a Quiet Zone and the difference in distractions is astronomical. Fewer people sit there now and those that moved to another zone are the ones that congregated and had loud conversations, held meetings on their computer speakers or wore wireless headphones and walked around the area talking loudly, etc. I love the newly created Quiet Zone! Thank you! — Associate, More than 10 years

• RE: Virtual collaboration with remote or hybrid colleagues. There are plenty of rooms for virtual collaboration, but they are all oriented around having multiple people in one room collaborating with others virtually. There's no setting for having a conference room like experience for a single individual who is working with others remotely. As a result. I'm at my desk the entire day in front of my laptop working just like I would anywhere else. So as a director with no direct reports in the Indy PulsePoint, my collaboration opportunities are virtually the same in and out of the PulsePoint. — Director or Manager, 6 to 10 years

• If I was able to work in at the same pulsepoint as memebers of my team I would feel my time in the office was worthwhile. However, no members of my direct team work at my pulsepoint, therefore I could be just as productive at my home as I could be at my office. There is no benefit to me coming into the office. I feel like the requirement for me to come into the office 3 days per week is a burden. The PulsePoint team does a great job trying to make the office feel fun, comfortable, and a productive working environment, but short of a serious benefit like free food, free coffee, or extra perks, being required to go into the office feels like a punishment. — Director or Manager, More than 10 years

• I find my time in the office to be very enjoyable, and my productivity is very strong. Minimal distractions and a great environment. — Director or Manager, More than 10 years
