QUESTION-LEVEL DETAIL BY SITE

One value per cell. For the 24 items with an Importance rating the value is **Friction** (0–100, higher = worse) and the cell carries the official status: ▼ Needs attention · ● On track · ▲ Exceeds needs. For **Digital & Tech** (no Importance rating) the value is **agreement** (1–5) with ◇ — it is **not comparable** with Friction. Hover a cell (HTML) for Importance, Support, Gap and severity. Items are ordered by company Friction within each dimension. Data source & method. PulsePoint survey export · completed responses · 10 in-scope sites. The Index Score is the unweighted average of the four Dimension Scores (0–100) — the same calculation as the Tableau deck. ± is the 95% margin from resampling respondents. Friction and status per the official Tableau spec. “Company” means the 10 in-scope sites pooled, in the selected population (completed responses or all responses). Comment themes and sentiment are automated and not yet validated.
