PulsePoints — Combined Portfolio Report Card

Round 1 (10 sites) and Round 2 (30 sites) · completed responses

Round 1 · 10 sites

69.0 ± 0.6

Overall PulsePoint Experience Index (0–100)
2,928 respondents · 4,939 comments from 1,994 people

Round 2 · 30 sites

62.3 ± 0.6

Overall PulsePoint Experience Index (0–100)
2,288 respondents · 4,120 comments from 1,619 people

> **Read this first.** The two rounds surveyed **different sites**. A difference between rounds describes two groups of sites (and possibly two points in time) — it is not a change at any site. Each site's standing is against its own round's average.

ROUND AVERAGES

Measure	Round 1 ± margin	Round 2 ± margin	Round 2 − Round 1	Reading
Index	69.0 ± 0.6	62.3 ± 0.6	-6.7 ± 0.9	Round 2 lower
Work Activity	62.5 ± 0.9	55.0 ± 1.0	-7.5 ± 1.4	Round 2 lower
Physical Feature	66.1 ± 0.7	60.0 ± 0.7	-6.1 ± 1.0	Round 2 lower
Service Level	75.4 ± 0.6	66.5 ± 0.7	-8.9 ± 0.9	Round 2 lower
Digital & Tech	72.0 ± 0.6	67.6 ± 0.7	-4.4 ± 0.9	Round 2 lower

Each round's average pools its own sites (Round 1: the 10 in-scope sites; Round 2: all 30 sites). **Like for like:** Round 2 did not ask “Ability to get help resolving workplace or technology issues while on site” (Service Level); “Support from a community manager” (Service Level), so this table compares both rounds on the items both asked. Official values with every item: Round 1 Index 69.0, Service Level 75.6; Round 2 Index 62.3, Service Level 66.5. ± is the 95% margin from resampling respondents within each site; the difference's margin combines both (independent samples). “Round 2 higher / lower” only when the difference's interval excludes zero.

ASSOCIATE SENTIMENT (1–5)

Summary question	Round 1	Round 2	Difference ± margin	Reading
Work Activity (Q8)	3.31	3.07	-0.24 ± 0.07	Round 2 lower
Physical space (Q12)	3.94	3.71	-0.23 ± 0.06	Round 2 lower
Services (Q16)	3.91	3.55	-0.36 ± 0.06	Round 2 lower
Technology (Q19)	3.83	3.63	-0.20 ± 0.06	Round 2 lower
Overall (average of the four)	3.75	3.49	-0.26 ± 0.05	Round 2 lower

Welch 95% interval on the difference of means. Q19's header text differs between the two exports; it is treated as the same question (owner's decision).

Sites are alphabetical — no ranking. Standing compares a site with **its own round's** average (Round 1: 69.0; Round 2: 62.3). Dimension cells share one colour scale across both rounds (lighter = lower). Round 2 sites with fewer than 30 responses are marked “small sample”.

SURVEY ITEMS — ROUND 1 VS ROUND 2

Survey question	Round 1	Round 2	Difference ± margin	Reading
Work Activity — Friction (0–100) · status				
Focused individual work that requires concentration and minimal interruption	▼ 29	▼ 34	-0.27 ± 0.09	Round 2 lower
Tasks requiring discretion	▼ 23	▼ 28	-0.28 ± 0.10	Round 2 lower
Virtual collaboration with remote or hybrid colleagues	▼ 19	▼ 24	-0.24 ± 0.09	Round 2 lower
Learning, training, or skill development	● 10	● 14	-0.20 ± 0.08	Round 2 lower
Working with others on shared tasks or problem-solving	● 8	● 12	-0.26 ± 0.09	Round 2 lower
Informal or spontaneous collaboration with colleagues	● 5	● 8	-0.23 ± 0.08	Round 2 lower
Planned in-person meetings at a PulsePoint	▲ 1	▲ 2	-0.14 ± 0.08	Round 2 lower
Physical Feature — Friction (0–100) · status				
Availability of spaces that support focused work	▼ 27	▼ 30	-0.13 ± 0.09	Round 2 lower

Survey question	Round 1	Round 2	Difference ± margin	Reading
Availability of spaces that support discretion	▼ 27	▼ 30	-0.16 ± 0.09	Round 2 lower
Thermal / temperature comfort	▼ 21	▼ 24	-0.17 ± 0.08	Round 2 lower
Furniture comfort and ergonomics (including adjustability of chair and workstation)	▼ 13	▼ 17	-0.20 ± 0.08	Round 2 lower
Lighting comfort (natural and artificial)	● 11	▼ 15	-0.23 ± 0.08	Round 2 lower
Availability of spaces that support personal wellbeing or restoration (quiet space, wellness rooms, walking treadmills, etc.)	● 9	● 13	-0.22 ± 0.08	Round 2 lower
Ease of navigating and finding spaces (directions and signage)	● 9	● 8	+0.15 ± 0.07	Round 2 higher
Availability of meeting and collaboration spaces (individual and group)	● 8	● 8	+0.03 ± 0.08	No clear difference
Availability of community spaces (i.e. gathering, event spaces, café)	● 2	● 4	-0.17 ± 0.07	Round 2 lower
Service Level — Friction (0–100) · status				
Availability of on-site food and beverage options	● 14	● 18	-0.12 ± 0.10	Round 2 lower
Cleanliness and upkeep of PulsePoint	● 8	▼ 14	-0.32 ± 0.07	Round 2 lower
Reliability of building operations (e.g., elevators, restrooms, etc.)	● 8	▼ 12	-0.18 ± 0.06	Round 2 lower
Communication about workplace updates, changes, or disruptions	● 6	● 9	-0.13 ± 0.06	Round 2 lower
Access to workplace support services that support daily needs (e.g., office supplies, printing, mail)	● 5	● 8	-0.10 ± 0.07	Round 2 lower
Entry and reception	● 1	● 2	-0.16 ± 0.07	Round 2 lower
Digital & Tech — agreement (1–5)				
Technical issues that affect my ability to work are resolved in a timely manner	◇ 3.81	◇ 3.46	-0.35 ± 0.05	Round 2 lower
Video conferencing and meeting room technology reliably support in-person and virtual meetings	◇ 3.72	◇ 3.53	-0.19 ± 0.05	Round 2 lower
Workplace-provided hardware (e.g., monitors, keyboards, mice, power) is readily available and works as expected	◇ 3.80	◇ 3.63	-0.17 ± 0.06	Round 2 lower
I can connect and start working at a PulsePoint without unnecessary technical friction (WiFi, power or cabling, monitors or peripherals, log-in/system access)	◇ 3.85	◇ 3.70	-0.15 ± 0.06	Round 2 lower
Digital collaboration tools (e.g., Microsoft tools) support effective work with remote or hybrid colleagues	◇ 4.06	◇ 3.95	-0.11 ± 0.04	Round 2 lower
Reservation tools are easy to use	◇ 4.03	◇ 3.96	-0.08 ± 0.05	Round 2 lower

For items with an Importance rating the cells show Friction and the official status (▼ Needs attention · ● On track · ▲ Exceeds needs); the difference column compares the **gap** (Support − Importance, 1–5), where a positive value means Round 2 is better supported. Digital & Tech items (◇) compare mean agreement (1–5). 95% margins treat respondents as independent and do not allow for clustering within sites, so they are slightly narrow.

COMMENT THEMES — SHARE OF RESPONDENTS RAISING EACH

Theme	Round 1 people (%)	Round 2 people (%)	Difference	Reading
Hardware (Monitors / Peripherals)	639 (22%)	534 (23%)	+2 pts	No clear difference
Noise & Distraction	669 (23%)	533 (23%)	+0 pts	No clear difference
Privacy & Confidentiality	612 (21%)	510 (22%)	+1 pts	No clear difference
Food & Beverage	564 (19%)	467 (20%)	+1 pts	No clear difference
Connectivity (WiFi / Login / Power)	422 (14%)	364 (16%)	+1 pts	No clear difference
Temperature / Thermal	392 (13%)	350 (15%)	+2 pts	No clear difference
Desk Availability & Reservations	531 (18%)	347 (15%)	-3 pts	Differs
Focus / Concentration	400 (14%)	312 (14%)	-0 pts	No clear difference

Top themes in either round. Two-proportion test per theme with a Benjamini–Hochberg correction across the themes shown; “Differs” = adjusted $p < 0.05$. Generic praise / dissatisfaction buckets are excluded. The keyword taxonomy was tuned on Round 1 comments; its precision on Round 2 has not been checked.

Data source & method. PulsePoint survey exports, Round 1 and Round 2 · completed responses. Index = unweighted average of the four Dimension Scores (0–100), the Tableau calculation, applied to each round separately. “Company” means the 10 in-scope sites pooled, in the selected population (completed responses or all responses). “Round 2 average” means the 30 round 2 sites pooled, in the selected population (completed responses or all responses). Round 2 sites are compared only with each other. Comment themes and sentiment are automated and not yet validated.
